

## Data Page

The **Integrated Network for Societal Conflict Research (INSCR)** was established to coordinate and integrate information resources produced and used by the Center for Systemic Peace. The following data resources were prepared by researchers associated with the Center for Systemic Peace and are generated and/or compiled using open source information. These resources are made available as a service to the research community. All CSP/INSCR data resources have been cross-checked with other data resources to ensure, as far as possible, that the information recorded is accurate, reliable, and comprehensive.

**All resources listed on this page are copyrighted by the Center for Systemic Peace.** Use of any of these resources in published work must provide proper citation. Reproduction or redistribution of these resources, or substantial portions thereof, is prohibited without prior, written permission from the Center for Systemic Peace; contact information is provided on the CSP Contact Page. The INSCR data resources cover all independent countries with a total population of 500,000 persons in the most recent year (167 countries in 2017). Most of the CSP data resources are considered living data resources, that is, they are updated and revised on an annual cycle and re-examined whenever new sources of information become available. Some of the data resources may be embargoed for a short period of time before the most recent version is released to the public. Researchers with an immediate interest in the most recent update of an embargoed resource should contact CSP directly. New information resources are under development; please check the Research and Development Page (under Analysis in the tool bar, above) for more information on these projects.
