BJ

Dear Anina,

Thanks for your questions and it is my pleasure to share the data with you.

1) The data source is:
Ethnic,Linguistic,Religious - Fractionalization, ChartsBin.com, viewed 10th December, 2019, <http://chartsbin.com/view/41703>.

2) We have multiple data points for some countries but not others because the full data set was trimmed to include only those countries with full data for the main independent variable of interest (trade openness in our context).

Hope it helps.

With best regards,
Bo

>>> Hi Bo,
>>> I want to introduce you to Anina—who is a postdoc at Harvard right now but will be spending some time working with us a the University of Maryland. Anina and I have a cross-national project looking at predictors of terrorism and we could use cross-national time series data on ethno-linguistic fractionalization. Could you please share with Anina

our data source for ethno-linguistic fractionalization? Thanks, GL
